

Skin Salve

Tools

- double boiler
- salve containers

Ingredients

- 1.5 cups of infused oil with your choice of vulnerary herbs
- 5 tablespoons of beeswax

Directions

- Fill the bottom portion of the double boiler with water and heat on medium heat.
- Add the top boiler pot to your double boiler and add the 1.5 cups of infused oil and 5 tablespoons of beeswax.
- While continuously stirring, allow the beeswax to melt into the oil.
- Once the beeswax has completely melted and dissolved into the oil, remove the pot from heat.
- Pour the mixture into salve containers.
- Allow to cool completely before capping. Label the container.

Usage

- The salve is usable immediately after it has cooled - use as necessary for cuts, stings, abrasions, etc.
- Store at room temperature with the lid closed.
- Salves will last for 2 years assuming optimal storage.
